Issue:

Create a quiz page in a grid layout format. To allow a user to rank the 17 SDG values according to their personal value

Solution:

Use a dnd-grid library to help us accomplish this.

Risk:

There will be potential merging error with SIGMA-005 as it does not contain history with each other

Good job guys. works nice/smoothly. Can see you guys put in a good amount of effort.

Tested trying to submit data with some of the SDGs still left in the lower container, and no GET/POST/PUT requests submitted, so that's good.

One minor thing that I think could improve it (even as a prototype) is adding some alerts when attempting to submit when there's still some SDGs left in the bottom container, and a confirmation alert message when submission is complete. Overall though, great!

Looks good to me! Meets all the acceptance criteria I can see. well done!!

added an alert pop-up and moved the button to the right

Metarock merged commit 4eeaa7f into main on 11 Oct 2021
