Gonna send the teams invite for 6pm with Leanna, probs should have done earlier. Also still working on the list update. Django doesn't support multi object updating by default so you have to use a lot of overrides and workarounds, it sucks. I've come close to getting a test model to work, its just a syntax problem now I think.

Jose 03/05/2022

sweet

ill be there

Chris 03/05/2022

u wanna jump in the call in 5? maybe have a quick pre chat on how we gonna address

Jose 03/05/2022

im on

Chris 03/05/2022

dsicord

P = share weighting
U = Total Renewable Energy (Mhw)
S = Total Energy Consumption (Mhw)

U/S = Affordable & Clean Energy

Weighted sdg value = $P * U / S$
= $P * U / S$
= $P * U / S$ = option 1

P = share weighting
U = Total Renewable Energy (Mhw)
S = Total Energy Consumption (Mhw)

U/S = Affordable & Clean Energy

$$\text{Weighted sdg value} = \frac{P * U}{P * S}$$

$$= \frac{P}{P} * \frac{U}{S}$$
