

# finappster Sigma Team Meeting Minutes

---

*Date | time:* 25/03/22 (1 hours) *Location:* Online (Microsoft Teams)

Meeting called by:	All	<b>Attendees:</b> Chris Stehlin, John Sangalang, Peter Scandle, Jose Santos
Type of meeting:	Team Meeting	
Facilitator:	All	
Note taker:	All	
Timekeeper:	All	

---

## Action Items

---

### Topic

- ✓ **Query regarding the way we handle fund data**
  - Chris proposed three ways. One is to calculate on frontend, with data upload app. Second calculate the backend. Third, redesign db
  - We would be better of taking a performance hit by calculating fund SDG / P data on the user frontend, to ensure that data is always correntOtherwise we could store Fund SDG / P values in a separate table but this is repeating the same data multiple times in the same db - bad practice.
  - Would be better practice to perform fund calculations on the live app than storing data twice, would also keep the upload app simpler but it depends on the significance of the performance hit that this would entail.
