

# finappster Sigma Team Meeting Minutes

*Date | time:* 06/04/22 *Location:* Online (Discord)

Meeting called by:	AUT	Attendees:	John Sangalang, Peter Scandle, Chris Stehlin, Jose Santos
Type of meeting:	Weekly team meeting		
Facilitator:	All		
Note taker:	All		
Timekeeper:	All		

## Action Items

### Topic

- ✓ **Going over the topic**
  - Going over the data again - are we certain that the share table data is not compatible with the fund table's share weighting?
  - Get Leeanna to go through it in detail, breaking down steps. If the steps are no different either way but the results are still different, Leeanna may have some error in her formulas.

AllN/A
- ✓ **Addressing the raw data:**
  - If Leeanna's formulas are accurate and there is an explanation for the numbers being different, we may have to make use of the raw data.
  - This means she would need to go through it with us in detail, but on top of that, it would be ideal if she could clearly document which columns are used for which SDGs and give us the plain text formulas for these so we can easily replicate them in code
  - Advise Leeanna of the risk of using the raw data as a table, especially with how volatile/often it seems to change. Any major changes in columns or formulas will completely break the expected implementation of this action.
  - Need to have proper sprint descriptions, and need to know how sprints have changed

AllN/A
- ✓ **Now looking at *real vs real enough* data:**
- ✓ **Minimum and maximum boundaries:**

## Other Information

Observers: N/A
