

## Sprint 4 (04/05/22 > 27/05/22)

Sprint goal: Finish funds and funds recommendation implementation, shares and funds recommendation implementation tidy-up, bulk data upload implementation, Heroku deployment fixing

**Must have** Tester - Peter

As a user, when I view the my values page after the quiz is complete, then I should be able to see fund recommendations, so that I may be able to find funds that align with my values.

👁️ 📄 2/2 JS

**Must have** Tester - Peter

As an admin, I want to be able to upload large amounts of share and fund data, so that I may populate my application's database with investments to compare investor's quiz values against.

👁️ 📄 4/4 JS

**Must have** Tester - John

**Backend** **Task**

Implement agreed upon calculation for funds table.

👁️ 📄 2/2 JS

**Must have** Tester - Chris

**Backend** **Task**

Implement agreed upon parsing of funds excel template to funds table

📄 3/3 JS

**Must have** Tester - Chris

**Front End** **Task**

Update frontend recommendation to handle funds overall SDGs for recommendations

📄 4/4 JS

## Sprint 4 unfinished user stories/tasks

These were left here instead of going in the product backlog because if someone else were to continue development, these should probably be worked on first, unless a complete redesign is in order.

**Should Have**

As an admin, I want to be able to delete data from the database, so that I may remove data that I no longer need.

👁️ 📄 1/3 JS

**Front End** **Backend** **Task**

Batch GET requests on my values page for share/fund fetching.

👁️ 📄 0/1 JS
