

api_shares

Last Updated: 14-May-2022

The purpose of this document is to outline the *api_shares* table stored on the *finappster* database to house investors' company share investment data.

Data Model

api_shares

This table is used to hold investors' company share investment data who are engaged with the *finappster* platform. It stores data around the provider and quantity of the investment, as well as any fees incurred with the investment.

Insert: New records can be created.

Update: Records can be updated.

Delete: Records cannot be deleted.

Column	Data Type	Nullable	Comment
id	integer	Not Null	The unique identity number associated with each share investment
name	varchar(1024)	Not Null	The name of the share
broker_provider	varchar(1024)	Not Null	The broker through which the share was purchased
