Action Items

Topic

- ✓ In this meeting we're looking to shape the final weeks of development for the *finappster Sigma* team. We'd like to ensure that all parties are on the same page as far as the work that will be delivered and that which will not.
- ✓ Of relevance is the specific implementation of the 'fund' data type, and how it can best be implemented given the limited timeframe remaining for the project as well as the current status of the solution.
