

- Given that I navigated to the long quiz page in some way, when the page finishes loading, then I should be able to drag any of the 17 SDGs over/under each other to rank them based on my values:
- ⊡ Ar
- ≪ Sh
- Given that I navigated to the long quiz page in some way, when the page finishes loading, then 17 sustainable development goal buttons of a kind should be viewable, in a separate section to the empty numbered list.
- Given that I navigated to the long quiz page in some way, when the page finishes loading, then the 17 SDGs should be draggable to the empty numbered list.
- Given that I have dragged some of the 17 SDGS to the numbered list, when I release it next to a number on the empty numbered list, then the SDG should be assigned to that number, and the SDG be removed from the section it was previously in:
- Given that I have released a SDG next to a number on the empty numbered list, when I drag it back to the SDG section, then that SDG should be removed and should stay back in the SDG section for later dragging.
- Given that I have released a SDG next to a number on the empty numbered list, when I drag it to a different number on the empty numbered list from below, then the SDG already there should be pushed up the list.
- Given that I have released a SDG next to a number on the empty numbered list, when I drag it to a different number of the empty numbered list from above, then the SDG already there should be pushed down the list.
