✓	**Discussion with Sprint 2**		

- Gathered as a team to discuss user stories that we want to complete within the first 'spring' o 2022 before the semester begins

- Chris and Jose want to continue prototyping the investment/share recommendation algorithm

- Create the 'shares' table to hold the dummy data

- Find an efficient sorting algorithm

- Peter wants to create a template database table document to show the team and stakeholders, with a view to create one of these for each of the main tables currently in use within the *finappster* app.

- Team is looking to implement more mob / peer programming over this sprint, particularly to upskill each member of the team with the different parts of the stack required.
